[Gmail](#) — [LinkedIn](#) — [GitHub](#)

OBJECTIVE

Software Developer with experience in building AI-powered applications, ERP/CRM systems, scalable web solutions, and enterprise automation platforms. Strong expertise in React.js, Node.js, Python scripting, RESTful APIs, MySQL, and conversational AI systems. Experienced in Agentic AI, third-party integrations, workflow automation, deployment, and full SDLC execution.

EDUCATION

B.Tech in Computer Science and Engineering

2021 – 2025

University of Engineering and Management, Jaipur

CGPA: 8.9

SKILLS

Programming Languages	C, C++, JavaScript , Python
Frontend	React.js, Next.js, HTML5, CSS3, Flutter
Backend	Node.js, Python Scripts, ASP.NET MVC, RESTful APIs
Databases	MySQL, Postgresql
AI & Automation	Agentic AI, Conversational AI, STT Model, TTS Model, LLM Integrations
Business Systems	ERP Development, Workflow Automation
Tools	Git/GitHub, Postman, Claude, Gemini CLI, Chatgpt CLI, Cursor, Google AI Studio, Antigravity, Perplexity
Cloud & Server	Hostinger, Server-side Rendering
Other	SDLC, API Testing, Third-Party Integrations

EXPERIENCE

Software Developer

June 2025 – Present

Code Cafe Lab IT Solutions — Jaipur, India

- Developed ERP and CRM-based business management systems using React.js, Node.js, MySQL, and Python scripts.
- Implemented modules for lead management, incentive generation, identity and access management (IAM), workflow automation, and reporting dashboards features for enterprise-grade ERP applications..
- Designed, consumed, and tested RESTful APIs using Postman for internal and third-party services.
- Built a company-level AI Caller system using Agentic AI and conversational workflows.
- Integrated WhatsApp APIs, Meta integrations, payment gateways, and multiple third-party platforms.
- Collaborated across the complete SDLC including requirement analysis, development, testing, deployment, and production support.

Web Development Intern

Oct 2023 – Nov 2023

CodeSpaze — Jaipur, India

- Built and optimized responsive web applications using HTML, CSS, JavaScript, and React.js.
- Improved UI/UX through interactive components and API integrations.
- Ensured cross-browser compatibility and performance optimization.

PROJECTS

AI Caller System (Enterprise Project): Developed a conversational AI calling platform using Agentic AI architecture. Implemented real-time API interactions(sTT, TTS,LLMs) using websockets, authentication workflows, WhatsApp and Meta integrations, and automation logic. Deployed and maintained the system on a live production server.

ERP System Implementation – Suncity Solar (Enterprise Project): Developed and customized ERP modules for solar lead management, project tracking, incentive management, and workflow automation. Implemented role-based access control, advisor/site surveyor incentive generation workflows, and API integrations for operational management. Collaborated in deployment, testing, production support, and process optimization for enterprise-level operations.

MindSnap – E-Learning Platform:

Built a full-stack LMS using PHP and MySQL with user authentication, role-based dashboards, course management, and responsive UI.

BSafe – Women Safety App:

Developed a real-time safety application with GPS tracking, SOS alerts, Firebase authentication, and Google Maps API integration.

CERTIFICATIONS

- Big Data Computing – NPTEL (Top 5%)
- AI-ML Virtual Internship – Google for Developers
- Data Analytics and Process Automation – Alteryx
- Android Developer Virtual Internship – Google for Developers
